The Bohemian Switzerland National Park is the youngest national park in the Czech Republic. The mission of the National Park is to preserve the local territory in its full beauty and to enable natural processes to prevail in this area. The focal point of the area protection is a unique sandstone rock town with the occurrence of rare plant and animal species and islands of well-preserved woods.

[The Bohemian Switzerland National Park](#)

[Podyjí National Park](#)

Podyjí National Park is representative of a well-preserved forest-valley in otherwise forest-free landscape in Southwest Moravia. It is characterized by extraordinary scenery, being home to features such as rocky amphitheatres, cliffs, meanders, detritus fields, impervious ravines, several types of heat land adorned with multi-colored layers of thermophilic plants, or alluvial plains around the river Dyje.

[National Park Šumava](#)

The Bohemian Forest mountain range is covered by the most extensive forest in Central Europe, whose natural composition was, however, changed and today spruce plantations prevail in most of the area. In many places non-native spruce varieties were planted. Šumava National Park is a great place for hiking, cycling, cross-country skiing and generally spending time in beautiful, unspoiled nature.

[Czech Forestry Society](#)

Czech Forestry Society (CFS) is an independent, non-governmental, non-profit, professional organization. CFS associates individuals and organizations interested in forestry and nature conservation, individual forest owners and others forestry enthusiasts. CFS organize around 20 seminars and two big conferences per year and participate in enlightenment activities.

The Association of Forestry-Wood sector companies associates important forestry companies and the largest wood processors in the Czech Republic. The Main goal is protecting legitimate interests of its members in society and contributing to the cultivation and positive development of the business environment in the forest-wood sector.
