and Wood Sciences**

We help

Supporting the DUHA company

The aim of the DUHA company is to work with adults with mental disabilities to expand their opportunities in various areas of life. Supporting DUHA by purchasing a painting became a traditional affair. The painting is ceremoniously handed over at the FLD Christmas Concert and is used for faculty New Year's cards. The author of the painting is also invited to the Open Days together with deputies of the company. The faculty also buys small ceramic products from the DUHA company as promotional material.

VLTAVA RUN - our teams of faculty staff and students run for a good thing

Since 2015, our faculty teams have been running every year in the VLTAVA RUN race. Under the motto "Together for a Good Thing", we participated in the ČEZ Foundation project in order to help disabled children. During the race, we are collecting points and after the race, we changed them into the help. For example, in this way we have already helped to Jakub from the Jedlička Institute in Prague, who suffers from muscular dystrophy and has been in a wheelchair since he was 4 years old. We ensured a laptop and a cell phone to him. From these races, we also supported sports club of the Jedlička Institute in Prague.

MaRUNka charity run

We also support the MaRUNka charity run, which takes place in Besednica. Money from the entry fee and donations from sponsors serve as a financial gift in favor of AutisCentrum, o.p.s.

Motol Hospital in Prague

We have been financially supporting the Motol Hospital in Prague for more than 10 years. In the photos below, for example, we hand over a check for 60000CZK to the head of the Department of Pediatric Surgery Jiří Šnajdauf.

Cooperation with the PTL, s.r.o. company

The PTL, s.r.o. company employs disabled people. This company ensures the promotion of the faculty via the internet and social networks throughout the year.

Afforestation after bark beetle calamity

In the autumn of 2019, students and employees of our faculty helped with the restoration of forests after the bark beetle calamity. We helped plant new forests to owners of private and municipal forests.
